

## About Netwurx and Kaizen

Kaizen offers cloud-based solutions for your business with seamless integration and scalability. Kaizen will grow with you and provides one point of contact, one bill, and one team that is intimately familiar with your entire technology front, not just one piece of it.

## Kaizen Voice VoIP

With your business in a constant state of change, you need a Voice solution that's both easy to learn and easy to use. Today, transforming your phone system is simple and cost effective, regardless of your business—whether you have five employees or five-hundred.

## All Kaizen Voice packages come standard with top of the line Phones and Network Switches

Top of the line phones from Cisco, Polycom, Yealink. Kaizen Voice utilizes industry standard networking hardware from Cisco and Netgear.

## Why businesses are using Kaizen Voice

SMBs today need technology solutions that help improve communications while driving productivity across the enterprise. They also want a reliable, high quality phone system that simply works. **Kaizen Voice adapts and adjusts to your needs seamlessly** working the way you need it to. That way, you can focus on your business, not your communications system.

## Key Differentiators

- |  |   |
|--|---|
| 1. Provides high quality, reliable cloud based solutions | 3. Costs less up front and over time vs. traditional on-premise |
| 2. Utilizes modern features with enterprise capabilities | 4. Future proofs your communications system                     |

**What is Hosted PBX and VoIP?:**

Hosted PBX (Private Branch Exchange) is the modern version of the traditional telephone closet. Kaizen Voice uses the hosted, or “cloud,” model and puts the brains of your phone closet into professionally maintained data centers, helping businesses like yours to transform their communications and improve productivity **without the need to purchase expensive, complex, depreciating phone system software and hardware.** Your service providers manage and monitor your system 24x7, allowing you to focus on work.

VoIP refers to phone services that are accessible through a high quality broadband connection. VoIP is typically more cost effective and scalable than traditional alternatives. With both Hosted PBX and VoIP, you and your team can work from the office, home, or on the road, or through your smartphone, **all while utilizing your company’s communications solution to help maintain and uplift your image and brand.**
